

Homework Assignment #6 – Boyer-Moore Algorithm for IndexOf in MyString Class
by Evan Olds
Cpt S 223

Submission Instructions:

Submit source code (zipped) to Angel BEFORE the due date/time. If the Angel submission is not working, then submit to TA via email BEFORE the due date/time. Optional: Include a readme.txt file in the zip with any relevant information that you want the grader to be aware of.

Assignment Instructions:

Read all the instructions *carefully* before you write any code.

Build off of homework 5 for this assignment. Implement the bad character rule of the Boyer-Moore algorithm for your IndexOf function. Alternatively, you can implement the good suffix rule. A third option is you could implement both, but you won't get any extra credit beyond the normal 10 points for the assignment.
